HAVE YOU EVER HEARD OF SPECIESISM?

Discriminating against some people because of their skin color or sex is unjustifiable. Discriminating against someone because of their species is equally unjustifiable.

RACISM  SEXISM  SPECIESISM

INTELLIGENCE IS NOT WHAT MATTERS: SUFFERING IS

Many humans have reduced intellectual capacity, nevertheless we respect them. What matters is that they can experience suffering and enjoyment.

Animals, like humans, can feel pain and pleasure because they have a nervous system. Intelligence doesn’t matter, neither does the species they belong to.

WHAT CAN WE DO?

Domesticated animals

- They’re exploited, suffer, and die
- Ways to help them
  - Used for food
  - Experimentation
  - Clothing
  - Entertainment
  - Workers
- Veganism

Wild animals

- Frequent threats
  - Lack of food
  - Weather conditions
  - Physical injuries
  - Natural disasters
  - Diseases
- Ways to help them
  - Inform others about their situation
  - Rescue, treat or give them shelter

In these ways we will contribute to ending all unjustified discrimination, including speciesism.
